CE 422/522 Open Channel Flow
Spring 2019

Catalog Description: (3 units) Specific energy, momentum and energy principles; Uniform flow and gradually varied flow versus rapidly varied flow; Hydraulic structures: spillways, culverts, bridges; Differential equations governing unsteady flow in open channels; Simple surface waves in subcritical and supercritical flows; Introduction of kinematic, diffusion, and dynamic wave methods; Simplified methods of flow routing.

Prerequisite(s): C E 218.

Course Objectives: It aims to provide an introduction of fundamental principles governing steady and unsteady flow in open channels and apply these theories to solve practical problems such as analyzing flood waves, understanding flood routine in reservoirs, sizing stable channels, designing bridges, culverts, energy dissipater, and spillways.

ABET outcomes:
Primary
1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgement to draw conclusions

Secondary
2. Ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. Ability to communicate effectively with a range of audiences

Instructor: Jennifer G. Duan, Ph.D., P.E.
Class time & place: Tues, Thurs 9:30-10:45am @ Mines & Metallurgy, Rm 213
Office Hours: Tuesday 1:00-3:00pm
Review Sessions: TBA
Office: CE 210, Civil Engineering Building, 1209 E. 2nd Street. Voice: 626-5946
E-mail: gduan@email.arizona.edu

Other materials will be supplied through course D2L website

Website: https://d2l.arizona.edu (follow instructions to the CE422/522 site)
Evaluation (CE 422 Students)

- Homework: 10%
- Projects (3): 30% (10% each)
- Midterm Exam (1): 25%
- Final Exam: 30%
- Presentation: 5%

Evaluation (CE 522 Students)

- Homework: 10%
- Three Projects (3): 30% (10% each)
- Mid-term Exam: 20%
- Final Exam: 25%
- Graduate Project: 10%
- Presentation: 5%

Graduate students will need to complete a technical report or paper in addition to all other requirements. Exams will be open book, and you will be allowed to bring only the textbook. Tests dates are approximate and will follow the termination of the topics assigned to the test.

Homework assignments will be posted at D2L site each Thursday and will be due on the following Thursday at the start of class. No late assignments will be accepted, including assignments turned in during or at the end of the class.

Tentative Schedule

Week #1: Introduction (Syllabus, office hour)

Week #2: Ch 1: Basic Principle
           Ch 2.1: Specific Energy

   Homework #1

Week #3: Ch 2.2: Critical flow depth

   Homework #2

Week #4: Ch 2.3: Weirs

   Homework #3

Week #5: Ch 3.1: Hydraulic Jump
           Ch 3.2: Momentum Principle

   Homework #4
Week #6: Ch 3.3: Supercritical flow transition

Homework #5

Week #7: Mid-term Exam and Review

Project #1: Laboratory experiments of open channel flow

Week #8: Ch 4.1: Uniform flow

Homework #6

Week #9: Spring Break

Week #10: Ch 4.2: Uniform flow computation

Homework #7

Week #11: Ch 4.3: Compound Channel

Homework #8

Week #12: Ch 5.1: Gradually Varied Flow
              Ch 5.2: Water Surface Profile Computation

Homework #9

Week #13: L.14. Ch 5.3: Natural Channel
              L.15. HEC-RAS: Steady Flow Basics

Project #2: Steady Flow Hydraulics of the Rillito River

Week #14: Ch 6.1: Hydraulic Structure: Spillways I
              Ch 6.2: Hydraulic Structure: Spillways II

Homework #10

Week #15: Ch 6.3: Hydraulic Structure: Culverts

Homework #11

Week #16: Ch 6.4: Hydraulic Structure: Bridge

Project #3: Culvert and Bridge Design in the Rillito River

Week #16: Student Presentation
Academic Integrity

Principle: Integrity and ethical behavior are expected of every student in all academic work. This Academic Integrity principle stands for honesty in all class work, and ethical conduct in all labs and clinical assignments. This principle is furthered by the student Code of Conduct and disciplinary procedures established by ABOR Policies 5-308 through 5-404, all provisions of which apply to all University of Arizona students.

This Code of Academic Integrity (hereinafter "this Code") is intended to fulfill the requirement imposed by ABOR Policy 5-403.A.4 and otherwise to supplement the Student Code of Conduct as permitted by ABOR Policy 5-308.C.1.

Failure to follow the code of academic integrity will result in failing the course and be reported to the Dean of Students’ office.

Prohibited Conduct: Conduct prohibited by this Code consists of all forms of academic dishonesty, including, but not limited to:

1. Cheating, fabrication, facilitating academic dishonesty, and plagiarism as set out and defined in the Student Code of Conduct, ABOR Policy 5-308-E.6, E.10, and F.1
2. Submitting an item of academic work that has previously been submitted without fair citation of the original work or authorization by the faculty member supervising the work.
3. Violating required professional ethics rules contained or referenced in the student handbooks (hardcopy or online) of undergraduate or graduate programs, or professional colleges.
4. Violating health, safety or ethical requirements to gain any unfair advantage in lab(s) or clinical assignments.
5. Failing to observe rules of academic integrity established by a faculty member for a particular course.
6. Attempting to commit an act prohibited by this Code. Any attempt to commit an act prohibited by these rules shall be subject to sanctions to the same extent as completed acts.

Student Responsibility

Students engaging in academic dishonesty diminish their education and bring discredit to the academic community. Students shall not violate the Code of Academic Integrity and shall avoid situations likely to compromise academic integrity. Students shall observe the generally applicable provisions of this Code whether or not faculty members establish special rules of academic integrity for particular classes. Students are not excused from complying with this Code because of faculty members’ failure to prevent cheating.
